Fax: (604) 885-7591

District of  
**SECHELT**

## How to order a free street tree

### 1. Pick your top three tree choices

- Visit [sechelt.ca](http://sechelt.ca) for a list of trees.
- Apply early as numbers are limited, not all trees will be available at all times. Every effort will be made to plant one of the trees you select.

### 2. Fill out the request form

Available online at [www.sechelt.ca](http://www.sechelt.ca) and within this brochure.

### 3. Submit the request form

Online: [sechelt.ca](http://sechelt.ca)

Email: [info@Sechelt.ca](mailto:info@Sechelt.ca)

Fax: (604) 885-7591

Mail: District of Sechelt  
PO Box 129  
Sechelt, BC  
V0N 3A0

Phone: (604) 885-1986

District of  
**SECHELT**

## Request-A-Tree Program

We gratefully acknowledge the financial support of the  
BC Hydro Community ReGreening Program

[www.sechelt.ca](http://www.sechelt.ca)

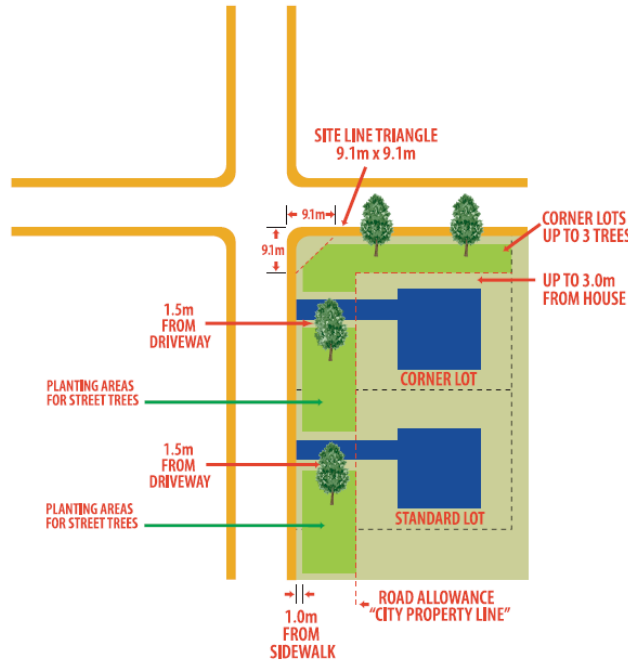

# Free Tree!

Thanks to support from **BC Hydro's Community ReGreening Program**, the **District of Sechelt** will be able to plant more street trees in our community through a Request-a-Tree program.

The Request-a-Tree program invites residents to apply to have a free street tree planted on the road allowance in front of their property. Sechelt Parks Department will plant the tree and, as 'adoptees', homeowners will commit to watering their tree a minimum of two years and during extended dry periods thereafter.

It is through innovative programs like this that the District is working to enhance our urban forest and to meet the goals set in our Urban Forest Plan.

# Tree Location Requirement Overview

If you live on a standard lot (see diagram), you can have one tree planted on the road allowance of your property. If you live on a corner lot (see diagram), you can have up to three trees planted.

Road allowances vary throughout Sechelt. Sechelt Parks staff will come out to see if there is enough space to plant a tree on the road allowance of your property.

# Help keep Sechelt Green

Trees help keep Sechelt clean and green by:

- Absorbing odours and pollution from the air
- Providing shade and bird habitat
- Reducing noise pollution
- Beautifying neighbourhoods

## Watering Tips

To get a good start a healthy tree needs at least 3 to 5 gallons of water twice a week for the first two years. Additional watering during hot, dry periods and in subsequent years may be necessary.
